| 2. Muzammil Siddiq | 18K-0361 |
| 3. Uzair Ahmed Mughal | 18K-0179 |
| 4. Laksh Kumar | 18K-0135 |
| 5. Syed Hamza Bin Maqsood Ali Shah | 18K-1254 |

Venue:

FAST - National University of Computer and Emerging Sciences, Karachi, Pakistan.

Research Problem:

Implementation of E-Voting System in Pakistan: A Detailed Study

Research Question/ Hypothesis:

The need for an efficient E-Voting System in Pakistan for a fair and effective Elections and how old traditional voting system are an obsolete system which needs to be discarded

Purpose:

We want to know how effective will be the use of e-voting system instead of traditional voting system during the Pakistani elections.

Relevance and Benefits of the Study:

Through this study we will establish that the current voting system has become totally obsolete and must be replaced with e-voting system as soon as possible for the sake of Integrity of Elections in Pakistan.

Research Methodology:

Online Survey will be done to get the opinion of general population and other stakeholders and detailed study of the software developed for use.
